Introduction

4

New Loops presents Serum Bass - 64 highly refined modern Bass presets for Xfer Serum. These Bass presets are not for the faint-hearted, they're big, deep, loud and damn right grimy.

You'll find everything from distorted Dubstep wobbles and sequences, robotic bandpass sweeps, and metallic Trap subs to punchy FM Trance Bases, dual-tone Future House plucks, electric EDM Bases and a lot more!

Serum Bass includes the highest quality, level matched presets with extensive use of Serums modulation. Each preset has Mod Wheel and Macros assigned allowing you to instantly morph presets into new sounds.

Serum Bass is perfect for any style of electronic music but is particularly suited to Dubstep, Trap, Drum and Bass, Hip Hop, Future Bass, Future House, Bass House, and modern Trance and Techno.

Also included are 10 analogue synth samples for using in your own presets.

As with all New Loops sample packs, once purchased Serum Bass is 100% royalty free to use in your songs and audio productions.

Installation

5

Installing this sound pack is easy. Simply download the Zip file and unpack. You can then move the entire folder to your preferred place on your hard disk.

Add Presets to Serum

Place the presets folder into the *Xfer Serum Presets* folder and use Serums browser to load the presets.

For more detailed help with loading presets refer to the Serum User Guide.

Please keep a backup copy of your sound pack.
