

MININOVA & ULTRANOVA

ULTIMATE PATCHES

FAST & EASY INSTALL GUIDE • PATCH LIST

New for 2022: 333 All-New Ultimate Patches!

To celebrate the 10th anniversary of the MiniNova's release, this is the brand new 3 volume set of pro-quality patches that stretch the limits of what the MiniNova / UltraNova were previously thought capable of. From authentic analog classics to digital future classics, enjoy these inspiring polys, basses, leads, sfx, and acoustic instruments.

Install Requirements

1. A MiniNova or UltraNova
 2. A PC (Windows 7+) or Mac (OS 10.9+)
 3. The free Novation Librarian 1.5* for MiniNova or UltraNova (PC/Mac) or the free MIDI-OX (PC) or SysEx Librarian (Mac) application
- * Note: do NOT install Novation Librarian version 1.6 on PC, as it often has issues starting up.

Notes

- **IMPORTANT:** Nearly all our patches utilize the Mod wheel for a unique alternate sound - make sure to always try it when checking out the patches. You'll be glad you did! In addition, many of the patches use the MiniNova animate pads / UltraNova touch knobs.
- Our sounds are not in categories on the MiniNova, as many of our patches are in categories that don't exist on the synth. Set your MiniNova Select/Edit dial to "ALL" to hear them.
- The patches all have a ">" at the start of the patchname, denoting these as Ultimate Patches. This is simply for your reference when "mixing + matching" patches from other sources.
- Some of the patches have intentional gain saturation crackling for authentic vintage sound.
- Levels vary from patch to patch, to provide you super-clean as well as oversaturated sounds.
- There are 2 ways to install the patches — either using the free Novation Librarian (easy), or by using a free 3rd party MIDI utility (MIDI-OX / SysEx Librarian etc). If you have issues with installing via the Novation Librarian, or prefer using a MIDI utility (MIDI-OX / SysEx Librarian etc.), use Option 2 on pages 3+4. Otherwise, install via the instructions on the next page.

Install Preparation - Novation Librarian (PC / Mac)

- Connect your synth to the computer (USB). Install the “MiniNova 1.5” software (or for UltraNova: UltraNova Update 1.4). This contains the Novation USB driver, firmware update, and Librarian 1.5. Get it here: <https://downloads.novationmusic.com/novation/synthesisers>
Note: Do NOT install Novation Librarian 1.6 on PC, as it has often has issues starting up.
- Continue to the “Backup your existing patches” section below
- If for any reason you have issues with the above, install only the newest Novation USB driver for your system, then do the following to install the firmware using MIDI-OX (PC) or SysEx Librarian (Mac):
<https://support.novationmusic.com/hc/en-gb/articles/207378175-How-do-I-manually-update-the-firmware-on-my-MiniNova-using-a-PC>
<https://support.novationmusic.com/hc/en-gb/articles/207562685-How-do-I-manually-update-the-firmware-on-my-MiniNova-using-a-Mac>
- If using Mac’s Big Sur OS, read the following additional install instructions: <https://support.novationmusic.com/hc/en-gb/articles/360016923240-Novation-product-compatibility-with-macOS-Big-Sur-11-on-Intel-based-systems>
- For any install or functionality issues, contact Novation support: <https://support.novationmusic.com>

Backup your existing patches

- Note that your existing patches in the synth will be overwritten when installing. Therefore, back up your patches before installing:
- With your synth connected to your computer via USB, open the UltraNova or MiniNova Librarian application. You will see “Device Status: Synchronizing” in the lower left corner of the application. After a few seconds it will change to “Device Status: Connected”, and you can proceed to the next step.
- Select My Patches, then select Bank A (or B or C). Right click and select “Export” to save your patches to your computer.

Install your Ultimate Patches

- With your synth connected to your computer via USB, open the UltraNova or MiniNova Librarian.
- In the Librarian, right-click on My Patches and select “Create Folder”. Name it “Ultimate Patches Volume 1” (or 2 or 3) or similar.
- Drag the MININOVA + ULTRANOVA ULTIMATE PATCHES - VOL 1.syx (or vol 2 or 3) file onto this folder.
- Now drag that folder onto “My Mininova” or “My UltraNova” into Bank A, B, or C.*
- Your new patches have now been copied to your UltraNova or MiniNova. **You’re ready to play!**

* If the Status in the lower left corner of the Librarian says “Protected”, (which prevents installing the patches to the synth) make sure Protection is turned off in the synth. If it’s off already but the Librarian still says Protected, try using a different USB cable / USB port, and dont use a USB extension cable.

Option 2: Installation via MIDI-OX (PC)

1. Download and install the free MIDI-OX (PC) program: <http://www.midiox.com>
2. Reboot your PC. Connect your synth to your PC via USB cable.
3. Open MIDI-OX. From the Options menu of MIDI-OX, choose "MIDI Devices."
4. Click the synth's name in the MIDI Inputs and MIDI Outputs areas of that MIDI Devices window. Click OK to close the dialog and save the settings.
5. From the View menu, choose "SysEx." Then, from the SysEx menu, choose "Configure."
6. Set the Low Level Output and Input Buffers "Num" and "Size" to 4096. Under Output Timing, make sure that "Auto-adjust Buffer Delays if necessary" is NOT enabled. Click OK to close the dialog and save the settings.

Backup your existing patches

7. In MIDI-OX, Select View > Sysex
8. Select Sysex > Receive Manual Dump. The "SysEx Receive" window will open.
9. On your synth, go to the "Dump" menu and scroll to "Dump Bank" or "Dump All".
10. Press OK on the synth to send the data to MIDI-OX.
11. MIDI-OX will receive the data within a minute or so and during the process "Wait for completion" / Bytes Received" will display. Once the Bytes Received are no longer changing, click "Done."
12. Go to Display Window > Save As to save your sysex (.syx) file to your PC. It is now backed up for safekeeping.

Install your Ultimate Patches

13. Make sure you have completed steps 7-12 of the "Backup your existing patches" section above.
14. From the Command Window menu of MIDI-OX, choose "Load File" and open the MININOVA + ULTRANOVA ULTIMATE PATCHES - VOL 1. syx (or Vol 2 or 3) that you purchased from us.
15. From the Command Window menu, choose "Send SysEx." The patches will now send to your synth within a minute or so, and will replace any existing patches previously on your synth. You're ready to play!

Installation Option 2: Installation via SysEx Librarian (Mac)

1. Download and install the free SysEx Librarian: <https://www.snoize.com/sysexlibrarian>
2. Connect your synth to your Mac and reboot your Mac. Before starting SysEx Librarian, close all other audio or MIDI or DAW software, and disconnect all other MIDI devices.

Backup your existing patches

3. Run SysEx Librarian and hit the Record One button.
4. On your synth, go to the “Dump” menu and scroll to “Dump All”.
5. Press OK on the synth to send the data to SysEx Librarian.
6. You’ll see “Done” in SysEx Librarian once the data has been received. This file is now stored in your SysEx folder. By default, this is a folder named “SysEx Librarian”, in the Documents folder in your home folder.

If you need it, more detailed instructions + troubleshooting are at <https://www.snoize.com/sysexlibrarian/docs.html>

Install your Ultimate Patches

7. Run SysEx Librarian and choose your synth as the Destination.
8. Click Add/+ to add the .syx file (you downloaded from us - eg NOVATION ULTIMATE PATCHES VOL. 1.syx) to the file list — or simply drag and drop the file on the open SysEx Librarian window. The file name appears in the file list and should be highlighted.
9. Click Play. The patches now send to your synth in less than 1 minute, and will replace any existing programs previously on your synth. You’re ready to play!

If you need it, more detailed instructions + troubleshooting are at <https://www.snoize.com/sysexlibrarian/docs.html>

Legal: Thank you for using Ultimate Patches. We appreciate your business! Use these patches freely to create musical ideas and songs with — they can be used in personal or commercial recordings or playing live. None of the patches can be redistributed for free, and/or resold in any way. The compositions in the Youtube video demo are copyright protected via their respective owners, and are used only for demonstration purposes of the patches. Much of the original music in the Youtube video demo is available for purchase or licensing for your own recordings; contact support@ultimatepatches.com for more information.
