

PRO-800 ULTIMATE PATCHES

FAST + EASY USB INSTALL GUIDE & PATCH LIST

300 All-New Premium Pro-800 Ultimate Patches!

Congratulations on your purchase of Pro-800 Ultimate Patches - with 300 inspiring sounds in the collection, this is the most comprehensive series of high-quality Pro-800 sounds spanning classic synths to futuristic new sounds, guitars, acoustic instruments, classic pop and rock, tech house, R&B, country, hip hop, jazz, synthwave, deep house, funk, reggae, orchestral, indie, latin, reggaeton, disco, dubstep, retrocade, soul and more!

Installation Requirements

- A Pro-800 • A PC (Windows 7+) or Mac (macOS 10.7+)
- **Pro-800 firmware 1.2.7 ONLY** (do not load our v1.2.7 patches if your Pro-800 firmware is different than 1.2.7 as the patches will not sound correctly due to firmware changes. We have provided you with 1.3.7 versions of our patches should you update your firmware to 1.3.7).

IMPORTANT!

- **Nearly all our patches utilize the Mod wheel and / or aftertouch for expressive sounds - make sure to always try them when checking out the patches. You'll be glad you did!**
- **To allow proper tuning, always turn on the synth and let it warm up for 20 minutes before playing it.**
- **The patches all have "UP" at the start of the patchname, denoting these as Ultimate Patches. This is simply for your reference when mixing and matching with other patches in the future when a patch librarian is available.**
- **If you're having issues with importing sounds, do a factory reset which restores settings back to default (this may also restore the factory presets and overwrite all patches in the synth). To do this, hold the SETTINGS button while powering up the PRO-800. To backup your sounds first, follow the backup procedures below.**
- **There's a known Pro-800 bug where once in a while a patch will sound weird/glitched. If this happens, restart the synth twice. Now select any other patch and then select the patch you want to play.**
- **Once a stable and free Pro-800 patch librarian is available, we will add those install instructions in this manual.**
- **Some patches have no names, as naming is still experimental and is limited. Once it's fixed, we'll add them.**

Installation Preparation

1. Connect your Pro-800 to your computer using a high quality USB cable. Make sure your synth's firmware is 1.2.7 (Firmware version displays on the synth at startup). Download the free SYNTHTRIBE program / firmware updater here: <https://www.behringer.com/product.html?modelCode=P0E9I#>
2. Hold SETTINGS and press 1. You will see "MIDI Input Channel". Make sure it is "Dips" or "Ch 1". Press 1 again and make sure "MIDI Output Channel" is also "Dips" or "Ch 1". If you selected "Dips", the dipswitches on the back of the synth determine the MIDI channel - set it to channel 1 (factory default). Press SYSTEM again to exit.
3. Hold SETTINGS and press 1 a few times until you see "Soft Thru". Turn the data knob to select OFF. Press SYSTEM to exit. NOTE: This setting resets back to "on" after every restart. Make sure Soft Thru is OFF when loading or backing up patches or you will encounter errors transferring patches.
4. Hold SETTINGS and press 8 until you see Voice Spread. Make sure this is ON. Press SYSTEM again to exit.
5. Hold SETTINGS and press 1 until you see MIDI CC and MIDI PC: make sure these are "tXRX". Press SYSTEM to exit.
6. Extract the .zip file you purchased from us, to a folder on your desktop. Do not change the filenames.

FAST + EASY USB INSTALL GUIDE & PATCH LIST

Installation via PC (MIDI-OX)

1. Download and install the free MIDI-OX (PC) program:
<https://www.midiox.com>
2. Reboot your PC. Connect your synth to your PC via USB cable.
3. Open MIDI-OX. From the Options menu of MIDI-OX, choose "MIDI Devices."
4. Click the synth's name in the MIDI Inputs and MIDI Outputs areas of that MIDI Devices window. Click OK to close the dialog and save the settings.
5. From the View menu, choose "SysEx." Then, from that SysEx menu, choose "Configure." Set the Low Level Output and Input Buffers "Num" to 512 and "Size" to 32, and "Delay Between Buffers" / "Delay After F7" both at 60ms (See settings at right). Under Output Timing, make sure "Auto-adjust Buffer Delays if necessary" is NOT enabled. Click OK to close the dialog / save the settings.

Configure

Low Level Input Buffers

Size 512 Bytes

Num 32

Low Level Output Buffers

Size 512 Bytes

Num 32

Output Timing

Auto-adjust Buffer Delays if necessary

Delay Between Buffers: 60 Milliseconds

Delay After F7: 60 Milliseconds

Don't Warn to Save Changes

Append To Bytes in Display Window

Fill Display Window as Bytes Come In

Show F0-F7 in colored text

Save Dump directly to a file

OK

Cancel

Backup your existing patches

6. In MIDI-OX, select View > Sysex
7. Now, select Sysex > Receive Manual Dump. The "SysEx Receive" window opens.
8. On your synth, press and hold SETTINGS and press 3 twice to start the data backup.
9. MIDI-OX will receive the data which will take up to a minute or so and during the process "Wait for completion" and "Bytes Received" will display. Once the Bytes Received are no longer changing, click "Done."
10. Go to Display Window > Save As to save your sysex (.syx) file to your PC. It is now backed up for safekeeping.

Install your Ultimate Patches (Important! This will overwrite ALL patches in your synth*)

11. Make sure you have completed the Installation Preparation steps.
12. From the View > Sysex > Command Window menu of MIDI-OX, choose "Load File" and open the .syx file you purchased from us. eg; PRO-800 ULTIMATE PATCHES - VOLUME 1. syx (or Vol 2, 3, Vol. 1-3, or Taster Pack).
13. From the same Command Window menu, choose "Send SysEx." The patches will now send to your synth taking approximately a minute or so, and will replace any existing patches previously on your synth*. Reboot your synth. You're ready to play! **FYI: Bank A are the factory patches, Bank B is Volume 1 (or our Taster Pack, if installed), Bank C is Volume 2, Bank D is Volume 3.**

*Note: When you install a single volume or the taster pack, the patches will be installed along with the factory presets (Bank A) as well as blank patches in all the other slots/banks, overwriting any patches in the synth. Similarly, when you install the Volume 1-3 Value Bundle, the factory patches (Bank A) will be installed and all patches that were in the synth will be overwritten. So make sure to back up your patches before installing!

PRO-800 ULTIMATE PATCHES

FAST + EASY USB INSTALL GUIDE & PATCH LIST

Installation via Mac (SysEx Librarian)

1. Download and install the free SysEx Librarian: <https://www.snoize.com/sysexlibrarian>
If you have macOS higher than 10.13, scroll down the page to choose the version for your macOS.
2. Connect your synth to your Mac and reboot your Mac. Before starting SysEx Librarian, close all other audio or MIDI or DAW software, and disconnect all other MIDI devices.

Backup your existing patches

3. Run SysEx Librarian and hit the Record One button.
4. On your synth, go to the "Dump" menu and scroll to "Dump All".
5. Press and hold SYSTEM and press 3 twice on the synth to send the data to SysEx Librarian.
6. You'll see "Done" in SysEx Librarian once the data has been received. This file is now stored in your "SysEx" folder. By default, this is a folder named "SysEx Librarian", in the Documents folder in your home folder.

If you need it, more detailed instructions + troubleshooting are at <https://www.snoize.com/sysexlibrarian/docs.html>

Install your Ultimate Patches (Important! This will overwrite ALL patches in your synth*)

7. Run SysEx Librarian and choose your synth as the Destination.
8. Click Add/+ to add the .syx file you downloaded from us - eg; PRO-800 ULTIMATE PATCHES - VOLUME 1. syx (or Vol 2, 3, Vol. 1-3, or Taster Pack) to the file list — or simply drag and drop the file on the open SysEx Librarian window. The file name appears in the file list and should be highlighted.
9. In SysEx Librarian, click Play. The patches now send to your synth within 1 minute. *Important! This will replace any existing patches previously on your synth. Reboot the synth. You're done!
FYI: Bank A are the factory patches, Bank B is Volume 1 (or our Taster Pack, if installed), Bank C is Volume 2, Bank D is Volume 3.

If you need it, more detailed instructions + troubleshooting are at <https://www.snoize.com/sysexlibrarian/docs.html>

*Note: When you install a single volume or the taster pack, the patches will be installed along with the factory presets (Bank A) as well as blank patches in all the other slots/banks, overwriting any patches in the synth. Similarly, when you install the Volume 1-3 Value Bundle, the factory patches (Bank A) will be installed and all patches that were in the synth will be overwritten. So make sure to back up your patches before installing!

Troubleshooting

If you're having trouble with installing the patches, make sure you perform — in order and exactly — the installation preparation followed by the appropriate installation procedures in this guide. If you're still having issues, follow these steps:

1. Restore the factory settings on the synth following the instructions earlier in this manual. Repeat this step again. Then start the install process.
2. Make sure you've turned off Soft Thru in the synth (see Installation Preparation step 4).
3. If your MIDI interface requires a driver, make sure it is installed and working.
4. Make sure you've disconnected any non-usb MIDI cables from your synth.
5. Make sure you meet the Installation Requirements listed at the top of this manual.
6. Make sure you do NOT turn off the synth during the Installation Preparation and Installation process.

If all else fails:

7. Visit the Pro-800 Facebook Group to post your question to the helpful community there.
Pro-800 Facebook Group: <https://www.facebook.com/groups/BehringerPRO800>
8. You can also install the patches using another MIDI Sysex program of your choice, such as the Swumpf online Pro-800 editor / patch manager (experimental): <https://swumpf.com/pro800/>
9. If you've followed the instructions exactly and in order, and you still need help installing, contact Behringer Product support to request instructions on how to install and backup patches on the Pro-800: <https://community.musictribe.com/support>. If you still have questions, you can contact us via the contact page on our website: <https://www.ultimatepatches.com>

Pro Tip: A user created a handy Pro-800 Cheat Sheet showing all menu items and their button shortcuts - download it from the featured posts area of the **Pro-800 Facebook Group:** <https://www.facebook.com/groups/BehringerPRO800>

Legal: Thank you for using Ultimate Patches. We appreciate your business! Use these patches freely to create musical ideas and songs with — they can be used in personal or commercial recordings or playing live. None of the patches can be redistributed for free, and/or resold in any way. The compositions in the Youtube video demo are copyright protected via their respective owners, and are used only for demonstration purposes of the patches. Much of the original music in the Youtube video demo is available for purchase or licensing for your own recordings; contact support@ultimatepatches.com for more information.
